

VISHWAS TIWARI

AI Engineer

vishwastiwari1901@gmail.com | 7984527433 | [GitHub](#) | [LinkedIn](#)

SUMMARY

AI Engineer with **2.5+ years** of experience building and shipping production software, specializing in AI powered systems and backend engineering. Experienced in designing scalable architectures, integrating LLMs, building RAG pipelines, MCP servers, and agentic workflows. Focused on turning emerging AI capabilities into reliable, practical solutions that deliver real-world value.

SKILLS

Languages : Python, TypeScript, JavaScript

Backend : Node.js, FastAPI, Express.js, REST APIs, SQL, MongoDB, Redis

AI Engineering: LLMs, RAG, MCP, Agentic Systems, scikit-learn, TensorFlow, ChromaDB, LiteLLM

DevOps & Cloud : Docker, CI/CD, Azure

Dev Tools : Git, GitHub, Cursor, Claude Code, Codex, Postman, Ngrok

PROFESSIONAL EXPERIENCE

1. TestDino - A Cloud companion for Playwright testing framework

Aug 2025 - Present

AI/ML & Backend Engineer

- Built the MCP server that lets AI clients (Claude, Cursor) securely query test report data, now used by **most of TestDino users**, and shipped **5+ integrations** (Slack, GitHub, Jira, Linear, Claude Web) to streamline QA workflows.
- Drove backend improvements across infrastructure migration, monolith-to-microservice extraction, horizontal scaling, and CI/CD optimization; resolved **100+ Jira tickets** and **merged 250+ PRs**.
- Built an ML text classifier that sorts raw Playwright error logs into **5+ failure categories** to speed up debugging, plus an AI-driven blog publishing pipeline that automated content workflows.

2. DotSqaure AI - Enterprise AI engineering

May 2024 - July 2025

AI Engineer

- Worked across **4+ AI projects**, integrating LLM-powered applications using Hugging Face models and external APIs.
- Developed conversational AI chatbots for pharmacy brands, enabling customer interactions through context-aware, LLM-generated responses.
- Designed n8n automation workflows integrating LLMs to automate manual, repetitive business processes

PROJECTS

1. Test Triage Assistant

Oct 2025

- Hybrid triage: Fast **TF-IDF + Logistic Regression** classifier for test-failure labels, with low-confidence cases routed to **RAG + a local LLM** for plain-English root-cause explanations.
- Retrieval & LLM: Uses a local vector store (ChromaDB with TF-IDF fallback) to retrieve context and runs an on-host model via Ollama (example qwen3:8b).
- GitHub : <https://github.com/Vishwas1345/Failure-classifier>

2. Digit-Recognizer

July 2026

- 3-layer neural network from scratch in Python for MNIST digit classification.
- Implemented forward/backprop, gradient descent, and ReLU from scratch (**no ML frameworks**) to build intuition for what libraries like PyTorch abstract away.
- Trained and optimized the model over **900 iterations, achieving 95% test accuracy**.
- GitHub : <https://github.com/Vishwas1345/Digit-Recognizer>

EDUCATION

Bachelors of Computer Applications (BCA)

2023-2026

Bhagwan Mahavir University | 7.6 CGPA
